Education

Inderprastha Engineering College

Ghaziabad, India

Bachelor of Technology in Computer Science and Engineering (AI & ML) – CGPA: 7.16/10.0

Oct 2023 – May 2027

- Affiliated to Dr. A.P.J. Abdul Kalam Technical University, Lucknow
- Relevant Coursework: Deep Learning, Machine Learning, Data Structures & Algorithms, Cloud Computing, DBMS

Technical Skills

Languages: Python, SQL (HackerRank 5-star Gold), Java, C, JavaScript, MySQL

AI/ML & Deep Learning: TensorFlow, TensorFlow Lite, CNNs, Transfer Learning, Computer Vision, BigQuery ML

Cloud & DevOps: Google Cloud Platform (Compute, Storage, Pub/Sub, Cloud Functions, Kubernetes, Cloud SQL), AWS, Docker

Web Development: Django, HTML, CSS, JavaScript, SQLite, Database Design

Developer Tools: Git, GitHub, VS Code, Cloud Console, Natural Language API, Speech API

Experience

Social Summer of Code (SSOC)

May 2025 – Present

Open Source Contributor

Remote

- Contributing to open-source projects as part of SSOC 2025, collaborating with global developer community
- Implementing features and bug fixes across multiple repositories with focus on code quality and documentation

THINK AI IPEC

Sept 2023 – Nov 2024

Technical Head

Inderprastha Engineering College

- Led technical initiatives and organized AI/ML workshops for 100+ students, improving technical community engagement
- Coordinated hands-on coding sessions and hackathons, mentoring students in programming and cloud technologies
- Collaborated with faculty and industry experts to design curriculum-aligned technical events and learning paths

Social Winter of Code (SWOC)

Dec 2024 – Mar 2025

Open Source Contributor

Remote

- Successfully completed SWOC 2025 program, contributing to multiple projects with focus on collaborative development

Projects

Diabetic Retinopathy Severity Classification | TensorFlow, CNNs, Transfer Learning, TFLite

2024

- Built deep learning model using CNNs and transfer learning to classify diabetic retinopathy severity from retinal images
- Deployed TensorFlow Lite model on mobile interface, enabling real-time predictions for medical diagnostics
- Achieved high accuracy through data augmentation and fine-tuned pre-trained models for medical image analysis

SmartCare Hospital Management System | Django, SQLite, HTML, CSS, JavaScript

2024

- Developed full-stack hospital management system with emergency-focused workflows and role-based access control
- Implemented responsive patient-doctor portals with real-time appointment scheduling and medical records management
- Designed normalized database schema in SQLite for efficient data storage and retrieval of patient information

Movie Ticket Management System | Python, MySQL

2023

- Implemented database-driven ticket booking system handling movie schedules, seat allocation, and billing operations
- Designed relational database with optimized queries for concurrent bookings and inventory management

Certifications & Achievements

Google Cloud Platform (12+ Skill Badges): Deploy Kubernetes Applications, Manage Kubernetes in Google Cloud, Create ML Models with BigQuery ML, Prepare Data for ML APIs, Analyze Sentiment with Natural Language API, Cloud Speech API, Create and Manage Cloud SQL for PostgreSQL, Streaming Data Lake on Cloud Storage, Pub/Sub, Cloud Functions, Cloud Compute

HackerRank: SQL Advanced (5-star Gold Level), Problem Solving Intermediate (3-star Python, 3-star Java)

GeeksforGeeks: GfG 160 - 160 Days of Problem Solving with Summer Workshops (200+ algorithmic challenges)

Forage Virtual Experience: AWS APAC Solutions Architecture (Elastic Beanstalk design), Tata Cybersecurity Analyst (IAM)

Open Source: Social Winter of Code 2025 Completion, Social Summer of Code 2025 Active Contributor
